Changes in ER Diagram: (Part 2)

1) "Order_Record" entity is removed and merged in 'Borrowing' entity.

   Reason: As Order_Record entity is a subset of Borrowing entity, so there is no need of an extra entity.

2) We identified "Customer_Rating" as a Weak entity.
3) Renamed 'Film' entity to 'Movie' and renamed all entity with word film to movie.
4) We completely removed Genre entity and made a many-many relation 'belongsTo' between 'Movie' entities.
5) We introduced a new entity 'MoviesOffered' which is assosciated to Movie, Medium, Exemplar and Medium entities
